Disaster Early Warning Tech Expo – 2025

10–11 December 2025 | NDMA Headquarters, Islamabad

Organized by the **National Disaster Management Authority (NDMA)**, Prime Minister's Office

1. About the Expo

1.1 Overview

Step into the future of disaster management at the **Disaster Early Warning Tech Expo 2025 (DEWTE–25)**, NDMA's flagship event. Set for 10–11 December 2025 at NDMA Headquarters, Islamabad, the Expo brings together innovators, researchers, and policy experts to explore how emerging technologies can redefine disaster prediction, prevention, and preparedness.

Aligned with the vision of the **National Disaster Management Authority (NDMA)**, the Expo supports the goal of building a safer and more resilient Pakistan through technology, innovation, and teamwork. It shows NDMA's commitment to using science, data, and early warning systems to reduce disaster risks. By connecting research with practice, the Expo helps move ideas into real solutions that protect communities and save lives across the country.

1.2 Vision and Purpose

This is where ideas meet impact — where AI, IoT, and geospatial intelligence move from concept to action. Through live demos, expert panels, and collaborative showcases, participants will gain practical insights into building a smarter, safer, and more resilient Pakistan. The Expo will create a space for innovators, researchers, and institutions to share real examples of how technology can reduce disaster risks and protect lives. It will also help young professionals and students understand how new tools such as satellite mapping, mobile alerts, and data analytics can support early warning and quick response. By bringing science and policy together, the Expo aims to turn creative ideas into actions that build long-term national resilience.

2. Theme

2.1 Main Theme

“From Reactive to Proactive Disaster Management”

2.2 Objective

This year's theme shows a major change — from reacting after disasters to preventing them before they strike. NDMA is leading this shift by using real-time data, satellite systems, and advanced analytics to improve early warning networks. The goal is simple but strong: turn knowledge into readiness. By linking science, technology, and decisions, Pakistan moves closer to a future where communities are informed, prepared, and protected.

3. Program Overview

3.1 Day 1 – Wednesday, 10 December 2025

Theme: From Reactive to Proactive Disaster Management

Day 1 will focus on understanding how new technologies support early warning and quick action. It includes keynote talks, expert discussions, and case studies about modern systems for disaster risk reduction.

3.2 Day 2 – Thursday, 11 December 2025

The second day brings together innovation and real practice. Participants will explore live technology demos, data-sharing tools, and group sessions. The program mixes strategy, research, and technical learning to turn ideas into real solutions for resilience and readiness.

4. Expo Highlights

4.1 Key Features

- Keynote and Thematic Sessions
- AI and IoT for Disaster Forecasting
- Hackathon and Prototype Development
- Research and Poster Presentations

4.2 Collaboration and Engagement

- National and International Partnerships
- Networking and Collaboration Forums
- Women in Technology Segment
- Award and Recognition Ceremony

5. Participating Organizations

5.1 National Partners

NDMA (Lead), Pakistan Meteorological Department (PMD), SUPARCO, Aga Khan Agency for Habitat (AKAH), UNDP, Academia, Ignite, Private Tech Firms, Startups, and Media Partners.

5.2 International Collaboration

NDMA's International Collaboration Wing builds global and regional partnerships to improve early warning and disaster governance systems. Through cooperation with the **Commonwealth**, **ASEAN**, **SCO**, **ECO**, **SAARC**, and the **European Union**, NDMA supports knowledge exchange and teamwork in technology-based disaster management.

6. About NEOC

6.1 Role and Function

The **National Emergencies Operation Center (NEOC)** is NDMA's main operational hub for disaster monitoring and coordination. It is equipped with advanced analytics and visualization systems and works around the clock to track weather, earthquakes, and floods. NEOC supports decision-makers by giving real-time updates, data reports, and early warnings to save lives.

6.2 Capacity and Coordination

NEOC connects national and provincial authorities to improve coordination during emergencies. It ensures early warnings reach the right departments and communities at the right time, helping Pakistan act faster and more effectively.

7. Awards and Recognition

7.1 Award Categories

- Innovation in Early Warning Technology Award
- Best AI/IoT Solution for Climate Resilience
- Young Researcher Recognition

7.2 Purpose of Awards

These awards celebrate innovation, teamwork, and creative ideas that make Pakistan more resilient. They also encourage young scientists and institutions to keep building smart and safe solutions for the future.

8. Contact Information

8.1 General Details

National Disaster Management Authority (NDMA)

Prime Minister's Office, Islamabad, Pakistan

UAN: 051-111-157-157

Email: info@ndma.gov.pk

Website: www.ndma.gov.pk/tech-expo-2025

Headquarters Address: Main Murree Road, Near ITP Office, Islamabad

8.2 Stay Connected

Follow NDMA on social media for event updates, registration, and exhibition opportunities.

Building a Resilient Pakistan through Technology and Innovation.
